WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Print lying on its side (a 37 mm side face on the bed), so the clip bends along its layers and the largest span is 11.5 mm.

Tray: 42 high, 37 wide, 13 deep, walls 1.5, open on the lid side; corners rounded to 5 mm outside (3.5 mm inside). A groove 0.5 wide and 0.5 deep runs round the rim where the lid meets it.

Clip: a 2 mm bridge over the counter top and a 1.5 mm finger 18 mm long, both curved to the heel counter (32 mm radius inside). Fitted gap 3.8 mm; 2.8 mm as printed (1 mm grip).

Round every edge of the finger to 0.5 mm: it rests on the heel.

Tail slot 10 x 0.6 mm in the shoe-side wall, just under the roof.

USB-C notch 9.4 mm wide in the bottom wall, open to the lid side.

Four bosses 4 mm round, 5 mm deep, in the corners, 1.6 mm pilot holes for the M2 screws.

Check: the finger springs back after a 1 mm push; the slot passes the tail; an M2 screw starts in each boss by hand.
